P. 003

Appl. No.: 09/956,998

Amdt. dated September 24, 2004

Reply to Communication of August 25, 2004

ALSTON & BIRD

Amendments to the Claims:

1. (Currently amended) A masked expression cassette comprising a double stranded nucleic acid molecule wherein a first strand comprises an RNA sequence which codes for a protein of interest linked downstream of a flanking sequence having at least a portion of a target polynucleotide sequence, and a translation initiation site operably inserted upstream of the RNA sequence; and,

the a second strand bound to the flanking sequence, wherein said second strand comprises a polynucleotide corresponding complementary to said first strand and to a target molecule.

- 2. (Original) The cassette of claim 1, wherein said cassette further comprises a 7-methyl guanine cap linked to the 5' end of the flanking sequence.
- 3. (Original) The cassette of claim 2, wherein said protein of interest comprises a toxin selected from the group consisting of Pseudomonas exotoxin A, ribonuclease, Barnase toxin, Pertussis toxin, and cholera toxin.
- 4. (Currently amended) A masked expression cassette comprising a double stranded nucleic acid molecule comprising a first strand comprising a 5' sense sequence and a 3' sense sequence;

said first strand further comprising an RNA sequence which codes for a protein of interest linked downstream of said 5' sense sequence, and a translation initiation site operably inserted upstream of the RNA sequence; and,

the second strand bound to said 5' sense sequence and to said 3' sense sequence, wherein said second strand comprises a polynucleotide corresponding complementary to said 5' sense sequence and to said 3' sense sequence and to a target molecule.

5. (Original) The cassette of claim 4, wherein said cassette further comprises a 7-methyl guanine cap linked to the 5' end of said nucleic acid molecule.

ALSTON & BIRD

- 6. (Original) The cassette of claim 5, wherein said protein of interest comprises a toxin selected from the group consisting of Pseudomonas exotoxin A, ribonuclease, Barnase toxin, Pertussis toxin, and cholera toxin.
- 7. (Currently Amended) A masked expression cassette comprising a double stranded nucleic acid molecule wherein a first strand comprises an RNA sequence which codes for a protein of interest linked downstream of a plurality of sense sequences, and a translation initiation site operably inserted upstream of the RNA sequence; and,

a plurality of second strands, each bound to an individual sense sequence, wherein each of said second strands comprises a nucleotide sequence corresponding complementary to one of said sense sequences and to a target molecule.

- 8. (Original) The cassette of claim 7, wherein said cassette further comprises a 7-methyl guanine cap linked to the 5' end of said nucleic acid molecule.
- 9. (Original) The cassette of claim 8, wherein said protein of interest comprises a toxin selected from the group consisting of Pseudomonas exotoxin A, ribonuclease, Barnase toxin, Pertussis toxin, and cholera toxin.
- 10. (Currently amended) The cassette of claim 8, wherein each of said sense sequences comprises a distinct nucleotide sequence and each of said second strands comprises a nucleotide sequence corresponding complementary to one of said distinct sense sequences and to a distinct target molecule.
- . 11. (Original) The cassette of claim 8 having two sense sequences and two second strands.
